

## Mesh Welders, Jig Welders, Butt Welders and Special Machines

At the upcoming *Wire & Cable India* show, **IDEAL-Werk** of Germany will be present at the **KEMTECH (India)** booth 1B37.

IDEAL-Werk is well known in the market for the design, development and manufacture of wire mesh welding machines for various types of industrial mesh and fences as well as for jig welders for wire and sheet metal articles, butt welding machines for all branches of the wire and cable industry and equipment engineered for special welding applications.

The features and design of these machines are made to assure high flexibility and short set-up times. High performance, burr free and reduced weld sparking, quick changeover units and utmost flexibility offers the customer a considerable reduction of welding cost and down times. New and user-friendly graphical interfaces enable a process reliability even with nonskilled operators.

In 2014, IDEAL-Werk celebrates the tenth anniversary of the company's quick setup mesh welding machines designed for industrial mesh and display products. Flexibility, fast changeover and supreme quality of the final product have always been IDEAL-Werk's long-time standards.

IDEAL-Werk has developed a new jig welding machine generation with turn and pivoting table for the manufacture of wire products in jigs. One special feature of this new jig welding machine is an automatic system for changing tools for easy handling of different wire pitches. This flexible jig welding machine solution has been especially engineered for working with various electrode forms and geometries as well as tooling.

To receive additional information along with technical specifications on the various types of welding machines and systems available from IDEAL-Werk, visit the company's website listed below.

## Machines, Plants, Tools & Accessories for the Wire/Wire Products Industries; New Representation in India

**KIESELSTEIN International GmbH**, located in Chemnitz, Germany, will exhibit at *Wire & Cable India 2014* in booth 1B37. Additionally, Kieselstein International GmbH announces cooperation with new representative for the Indian market.

From October 26 to 30, 2014, *Wire & Cable India 2014* will take place in Mumbai, India. With an expected growth within the next 20 years by a factor of five of today's economic force, the Indian market is one of the most interesting in the world—not only the Indian automotive industry, which is the seventh largest in the world, but with an increasing demand for wire and wire formed products.

Therefore, it is our great pleasure to announce our cooperation with a new representative in the Indian market. The company, **Kemtech International Private Ltd.**, located in New Delhi, India, has represented several companies from the wire industry ever since 1986. Therefore, Kemtech International Private Ltd. is able to offer Indian customers a wide range of machines and plants, accessories and tools for the wire and wire products industries.

Starting from September 2014, the machines and equipment of KIESELSTEIN International GmbH are a part of the portfolio available from Kemtech International Private Ltd.

During *Wire & Cable India 2014*, KIESELSTEIN International GmbH is being represented at the Kemtech booth for the first time. KIESELSTEIN International GmbH is looking forward to the show and hopes to make interesting contacts. Visit KIESELSTEIN International GmbH in booth 1B37 at the show.
